

AMENDMENTS

In the Claims:

This listing of claims replaces all prior versions, and listings, of claims in the application:

1. (Previously Presented) An electroluminescent display device comprising:

a red pixel, a green pixel and a blue pixel;

a red filter layer, a green filter layer and a blue filter layer that are provided for the red, green and blue pixels, respectively;

an electroluminescent element having a white electroluminescent emissive layer and formed above each of the red, green and blue filter layers; and

a thin film transistor driving the electroluminescent element and provided for each of the red, green and blue pixels,

wherein the white electroluminescent emissive layer is disposed continuously over the red, green and blue pixels.

2. (Currently Amended) An electroluminescent display device comprising:

a red pixel, a green pixel and a blue pixel;

a red filter layer, a green filter layer and a blue filter layer that are provided for the red, green and blue pixels, respectively;

an electroluminescent element having a white electroluminescent emissive layer and formed above each of the red, green and blue filter layers; and

a thin film transistor driving the electroluminescent element and provided for each of the red, green and blue pixels,

wherein a light transmittance of the red filter layer is 50% or lower at 584 nm, a light transmittance of the green filter layer is 50% or lower outside the wavelength range between 482 nm and 588 nm, and a light transmittance of the blue filter layer is 50 % or lower outside the wavelength range between 407 nm and 516 nm, and

wherein the white electroluminescent emissive layer is disposed continuously over the red, green and blue pixels.

3. (Cancelled)
